

WOOD SHAFT BRAND
ON THE PGA TOUR
8 YEARS IN A ROW

PROVEN TOUR TECHNOLOGY FOR THE MASSES.

As the leading wood shaft brand on the PGA, LPGA and Champions Tour it gives us great insight into what makes a great golf shaft. That's why not only do the best players in the world choose Fujikura, but the best Clubmakers do as well. You may not play on tour, but we can put a little tour in your game.

Fujikura

WWW.FUJIKURAGOLF.COM

E100 Series

The 100 Series is designed specifically for the player who is ready to get better but not yet ready for the Tour. Higher spin and a high launch profile allows for greater accuracy and distance with a minimum of effort. The E150 represent the 50g range geared for more distance, while the E160 is offered in the more popular 60g weight range for more accuracy. Completing the E160 series is an elongated length 0.370" hybrid and iron with ample parallel tip length for complete customization. Due to their extended lengths when cut down to size, these are the lightest iron and hybrid shafts in our entire catalog for potential greater distance.

Sakura

Sakura was engineered for the unique performance attributes of today's women golfer who expect the best from their golf equipment. These are very lightweight and amongst the most flexible shafts on the market to help to increase distance and trajectory for slow swinging golfers.

Sakura Sport

The Sakura Sport expands the women's shaft portfolio by offering a model designed specifically for the female golfer with a faster, stronger swing tempo.

Saishin

The Saishin is Fujikura's new economical line providing high-performance that their shafts are renowned for. The Saishin is an ultra-lightweight shaft geared for golfers with moderate speeds in stable, yet softer tipped design.

Note: The R2 flex is equivalent to what most manufacturers designate as Senior or A flex
