

SKHE
Helium**SKPE**
Pure Energy**SKTT80**
Tour Trac 80**SKVIP**
V.I.P.**SKWF**
Wedge Force**Helium**

The Helium features microweave technology that produces consistent performance by reducing head drop and twist at impact for maximum distance and pinpoint accuracy.

Pure Energy

Pure Energy is designed for today's oversized heads. The low to mid-high kick point and responsive tip help to reduce hooks and slices while adding distance.

Tour Trac 80

The Tour Trac 80's mid torque and mid kick point provide optimum ball control and trajectory for tight shot patterns and exceptional distance.

V.I.P.

Exceptional performance and high launch profile for players with slow smooth swing speeds looking for increased club head speed and distance.

Wedge Force

Finally a performance graphite golf shaft designed specifically for the scoring wedges. Crafted with a firm butt and responsive tip section for optimal launch angles and ball spin.

Yes! You can spend more...
But you can't buy
a more consistent shaft

SK FIBER shafts are recognized by many of the world's best club fitters, golfers and equipment manufacturers as the most consistent graphite shafts in the industry. Our tradition, since 1998, of sourcing premium composite materials, implementing leading edge design technologies and our stringent attention to quality control, assures a performance golf shaft specifically tailored to complement each golfer's strength and skill levels. SK FIBER shafts allow you to play your personal best.

UPGRADE TODAY FOR
CONSISTENT POWER
AND PINPOINT ACCURACY

SK FIBER Does not pay players on a professional tour to play or endorse our shafts. Shafts used by professionals are by the choice of the competitor.
